Diversified Agrisurance Company

Providing Multi-Peril/Replacement Cost Coverage When Disaster Strikes
Including Optional Coverage for Damage Caused By Mechanical or Electrical Failure

In the event of a loss, **you pick the dealer** that you want to repair or replace your damaged equipment. In most cases, your dealer will act as our adjuster. We want to get you back up and running as soon as possible. We understand that time is money during the growing season, which is when most claims occur.

We can also provide coverage for sudden structural damage to your irrigation system caused by or resulting from a mechanical or electrical failure. This coverage is available on qualifying irrigation units less than 20 years of age.

We offer **nationwide coverage at competitive rates**. Review your current policy. See if it pays Replacement Cost with no depreciation. See if it covers collapse due to a mechanical or electrical failure. Ask how fast claims are handled and who the company uses to adjust claims. Then Compare your policy to ours and you will find that we offer the most comprehensive policy in the industry. We know of no better coverage or service.

Our insurance organization including **Diversified Agrisurance Company**, has been a national leader in the irrigation insurance marketplace for over 40 years. This experience has allowed us to become the single **largest** insurer of self propelled irrigation equipment in the nation. Coverage is provided through Central States Indemnity Company of Omaha, an **A + rated** insurance company.

Our policy covers most direct physical losses to covered property due to an external cause. This is a **Replacement Cost** policy. Unlike most policies, we do not depreciate the value of your equipment in the event of a loss. We pay the **full cost to repair or replace**, whichever is less, up to the coverage amount shown for the property.
